ABSTRACT

Data on the high school status of first-time credit course students at the State University of New York for fall 1979 and 1980 are presented. In addition, comparative information is provided for students who graduated from high school in the 1970s, the 1960s, and 1959 or earlier, and data are provided for those holding a General Equivalency Diploma, those concurrently enrolled in a secondary school through early admissions, and those without a high school diploma not concurrently enrolled in a secondary school. The main body of the report arrays the number of students meeting the various conditions by load (full-time/part-time), in a program, and not in a program, and displays this data as both institution-type summaries and by individual institutions. Summary tables also show this data as percentage distribution by total university and by each institution type. Percentages of first-time credit course students drawn from the previous spring's high school graduates show considerable differences between institution types, between campuses within the same campus type and, between full-time and part-time students. Data are provided by the following institutional types: state-operated/funded institutions excluding community colleges, senior institutions, university centers, university colleges, health science centers, specialized colleges, statutory colleges, 2-year institutions, agricultural and technical colleges, and community colleges. A map locating the institutions of the state university and a table indicating the dates of establishment of the state university institutions are included. (SW)

INTRODUCTION

This volume combines the first and second annual study of the High School Graduation Year of First Time Credit Course Students in the State University of New York, Fall 1979 and Fall 1980. It is a 'first' and provides comprehensive data on the High School graduation year of first-time credit course students. It further provides information of those within this grouping holding a General Equivalency Diploma (GED), those concurrently enrolled in a secondary school (early admissions) and those without a high school diploma not concurrently enrolled in a secondary school. Together with this office's publication Age Group and Sex of Students which also contains some specific data on first-time students, comprehensive age and high school graduation year information on entering students is now available to the researcher.

This report is organized by Institution-type which include:

- Total University
- State-operated/funded Institutions (excludes Community Colleges)
- Senior Institutions
- University Centers
- University Colleges
- Health Science Centers
- Specialized Colleges
- Statutory Colleges
- Two-year Institutions
- Agricultural and Technical Colleges
- Community Colleges

The main body of this report arrays the number of students meeting the various conditions by

- Load (Full-time/Part-time)
- In a Program
- Not in a Program

and displays this data as both institution-type summaries and by individual institutions.

Summary tables are also provided which show this data as percentage distribution by Total University and by each institution type.

Percentages of first-time credit course students drawn from the previous spring's high school graduates show considerable differences between institution types, between campuses within the same campus type and, of course, between full-time and part-time students. The following table illustrates this point and provides an overview of the summary data.

PERCENT DISTRIBUTION OF FIRST-TIME STUDENTS

Community Colleges	45.0	67.0	11.7	55.0	33.0	88.3

Inferences to be drawn from these statistics for the purpose of enrollment projections may be significant; trend studies based on additional years' data may become equally significant for this purpose in the future.

This publication is divided into two sections. Section A contains all data tables for Fall 1979; Section B contains those for Fall 1980.

The main body of each section is divided into:
